Re: ANDREW PALLOS, D.D.S.

TO WHOM IT MAY CONCERN:

I have known Andrew Pallos, D.D.S. for 12 years, during which time he has shown himself to be an excellent student and practitioner of my diagnostic method patented in the United States and known as the BI-DIGITAL O-RING TEST (BDORT).

Dr. Pallos is also a remarkable dentist. Indeed, he is one of the top 3 dentists in the United States in learning my method and applying it to his profession. Though I live in New York City, I have traveled to California to be his patient because his skills and traditional training are excellent and because he has the knowledge to diagnose the difference between healthy and diseased root canals and other areas of the teeth and mouth, long before the eye can see it, as well as to distinguish between healthy and potentially harmful dental restorative materials such as crowns and composites. For these reasons, his dental work is not only structurally sound but also supportive of the patient's overall health. He is conscientious and meticulous in his work.

Dr. Pallos has been sincerely interested and highly motivated in his study and use of the BI-DIGITAL-O-RING TEST in dentistry. He has co-authored 3 professional research publications in *Acupuncture & Electro-Therapeutics*, *The International Journal*, which is indexed by 17 major international Indexing Periodicals. He has constructed and managed a website to represent my work, www.BDORT.org, and has produced 2 seminars and workshops each year for several years for doctors and dentists in Southern California. These professional meetings are accredited by the California State Board of Dental Examiners for 25 Continuing Education Units, Category I, for dentists. Dr. Pallos has served as a Visiting Associate Professor of Integrated Holistic Dentistry of the International College of Acupuncture & Electro-Therapeutics, New York, for the past few years, and is an excellent and supportive colleague. I recommend Dr. Pallos without reservation for whatever position he qualifies and seeks. He is respected among his peers, leads his colleagues well, communicates clearly and solves problems effectively.

If you would like further information, please feel free to contact me.

Very Truly Yours,

Yoshiaki Omura M.D., Sc.D.
